

KAIST, Daejeon, Korea

August 7-12, 2014

ICM Satellite Conference

Geometry on groups and spaces

This conference will cover various topics in the interplays between geometric group theory and geometric structures. The topics include discrete subgroups of Lie groups, hyperbolic geometry, Teichmüller theory, representation varieties, bounded cohomology, hyperbolic and CAT(0) groups and automorphisms of free and surface groups.

Plenary Speakers:

Yves Benoist (Univ. Paris-Sud)
Mladen Bestvina (Univ. Utah)
Martin Bridson (Univ. Oxford)
Michelle Bucher-Karlsson (U. Genève)
Marc Burger (ETH)
Richard Canary (Univ. Michigan)
Ruth Charney (Brandeis Univ.)
Daryl Cooper (UC Santa Barbara)
Patrick Foulon (Univ. Strasbourg)
Koji Fujiwara (Kyoto Univ.)
Ursula Hamenstädt (Univ. Bonn)

Alessandra Iozzi (ETH)
Jeremy Kahn (CUNY)
Olga Kharlampovich (CUNY)
Masato Mimura (Tohoku Univ.)
Shahar Mozes (Hebrew Univ.)
Denis Osin (Vanderbilt Univ.)
Joan Porti (Univ. Autònoma Barcelona)
Alan Reid (Univ. Texas Austin)
Mark Sapir (Vanderbilt Univ.)
Karen Vogtmann (Cornell Univ.)
Dani Wise (McGill Univ.)

Limited funding is available for graduate students and postdocs.
Online registration : <http://icm.cayley.kr>
The application deadline with financial support is March 15, 2014.
